### **Asset Allocation**

Fund's asset mix during the period under review:

	<b>31 July 2024</b>
	(%)
Fixed Income (Sukuk)	50.1
Cash & Cash Equivalents	49.9
<b>Total</b>	<b>100.00</b>

### **Strategies Employed**

The Fund aims to provide regular income to investors and to maintain a sufficient level of liquidity to meet cash flows requirements. The Fund primarily invests into Government Investment Issue ("GII"), and Government-Guaranteed Sukuk ("GG"), which are high-quality liquid assets. The Fund also invests into Islamic money market deposits for income and to maintain a low fund volatility. Over the period under review, the Fund maintained a balanced asset allocation between fixed income and Islamic money market deposits, with a portfolio duration of 0.86-year and portfolio yield of 3.6% at the end of financial period under review.

## **Market Review**

It was a volatile quarter for UST in May - July 2024. UST 10-year was initially declined to 4.34% in mid-May on the back of lower CPI readings, before gradually inched up to above 4.60% post the release of FOMC minutes. However, pockets of weaknesses in the recent economic data (weak ISM and NFP, slower GDP and higher unemployment rate) have sent the whole curve lower. As of end July, UST 2-year, 10-year and 30-year stood at 4.26% (-78bps QoQ), 4.03% (-65bps QoQ) and 4.30% (-48bps QoQ) respectively.

In the domestic market, MGS yields shifted lower tracking USTs although at a slower momentum. Ample domestic liquidity and demand for duration kept local bond yields anchored. On quarterly basis, yields for 3-year, 10-year and 30-year MGS ended the quarter under review at 3.37% (-24bps), 3.72% (-26bps) and 4.15% (-14bps) respectively.

The July BNM meeting saw OPR maintained at 3.00% while maintaining a neutral tone. The central bank highlighted that current OPR is supportive of economy and consistent with its current assessment of inflation and growth prospects. On domestic inflation, June headline CPI was stable at +2.0% coming in below consensus of +2.2% (May: 2.0%, 1H24: 1.8%). Core CPI remain unchanged at +1.9% (May: 1.9%, 1H24: 1.8%). This reflects muted impact from recent broadening of services tax base, diesel price adjustments in June 2024.

## **Investment Outlook**

The US Federal Funds Rate of 5.25-5.50% appeared sufficiently restrictive, with recent data showing signs of easing in wage growth and core inflation components. Looking past the current data driven volatility, the Manager opines that the US Federal Reserve should remain dovish over the medium term.

Domestically, Malaysia's growth and inflation remain within expectations. Despite the on-going subsidy rationalization, its impact on domestic inflation would require a longer time to ascertain. Hence, BNM is expected to prioritize growth over inflation in the near-term, giving rise to a stable OPR outlook.

With rationale above in mind, the Manager may extend portfolio duration but mindful of entry level. On going optimism is still subjected to key risks, such as (1) inflationary pressures both globally and domestically, (2) uncertainties surrounding the upcoming US presidential election, and (3) geopolitical tensions.

## **SHARIAH ADVISER'S REPORT**
