### **Basis of calculation and assumption made in calculating the returns:-**

The performance figures are a comparison of the growth/decline in NAV for the stipulated period taking into account all the distribution payable (if any) during the stipulated period.

An illustration of the above would be as follow:-

Capital return	= NAV per Unit end / NAV per Unit begin – 1
Income return	= Income distribution per Unit / NAV per Unit ex-date
Total return	= (1+Capital return) x (1+Income return) – 1

<sup>1</sup>The TER of the Fund was higher than previous year due to lower average NAV of the Fund over the financial period.

<sup>2</sup>The PTR of the Fund was lower than previous year due to lower trading activities of the Fund for the financial period.

## Income Distribution / Unit Split

The Net Asset Value per unit prior and subsequent to the distribution was as follows:-

Cum Date	Ex-Date	Cum-distribution (RM)	Distribution per Unit (RM)	Ex-distribution (RM)
20-Jul-21	21-Jul-21	0.5623	0.0200	0.5426

19-Jul-23	20-Jul-23	0.3967	0.9700	0.3862

No unit split were declared for the financial year ended 30 September 2023.

## **Market Review**

Market volatility persisted across the global economy as macro events and policy rate hikes affected stock and bond markets. The economic fallout from the Covid-19 pandemic coupled with the Russia-Ukraine conflict has disrupted supply chains and commodity markets, weighing heavily on global economic growth. Central banks continue to attempt rein in inflation contributed by supply-demand imbalances and volatility in energy prices among other factors through monetary policy, which inadvertently played a role in destabilising the banking sector March this year.

The US Federal Reserve (“Fed”) raised their policy rates in monetary policy committee meetings since March last year, to of 5.50% in July 2023. Although holding interest rates at the September 2023 Federal Open Market Committee Meeting (FOMC), the central bank signalled that interest rates could stay higher for longer to keep a lid on inflation. The sharp pace of policy tightening over the past months raised concerns in the financial markets of an over-tightening that could lead to a growth slowdown, or even a potential recession. Further signs of tension in the economy were also visible in March this year as the fallout of Silicon Valley Bank and the emergency rescue of Credit Suisse triggered concerns of contagion to other vulnerable banks. In addition to fractures in the banking sector, other notable events over the year included the concern over the US approaching its debt ceiling in January, failing which to reach a consensus to suspend or raise the limit could result in a catastrophic default. However, investors heaved a sigh of relief after lawmakers passed a bill to raise the debt ceiling, in a deal that included concessions on spending expected to have limited effect on economic growth. Despite narrowly avoiding a default, the U.S did not escape unscathed as Fitch Ratings downgraded its rating on U.S. debt, quoting in a press release “The repeated debt-limit political standoffs and last-minute resolutions have eroded confidence in fiscal management.”.

US equities was volatile throughout the year, as the financial sector disruption troubled markets in the first quarter of 2023, while gains in the second quarter of the year was mostly driven by the fervour and enthusiasm over new developments in artificial intelligence (“AI”). Zooming in closer on a monthly basis, although US equities ended July 2023 upbeat, gains were pared back, falling 1.77% over the month of August as stronger than expected economic data spurred bond yields close at 4.11%, a new high. US equities continued to swoon in September as the Fed struck a hawkish stance in its policy meeting, with the Nasdaq index plunging 5.81% as rate sensitive shares lost ground.

In Asia, despite starting off 2023 strong, Chinese equity trended downwards following the country’s reopening after the pandemic started to cool before lifting in July, driven by stimulus optimism in China, evident as the MSCI China Index vaulted 9.30% in July as top party leaders unveiled measures at its Politburo meeting to reinvigorate growth in the country. Among the measures include a pledge by Beijing to provide stimulus support for its beleaguered property sector. Top party leaders also emphasised the need for measures to tackle youth unemployment as well as accelerate the issuance of local government special bonds to spur government investment. While there were no explicit announcements of blockbuster stimulus, the overall policy tone from the Politburo meeting did exceed expectations. There was an acknowledgement of pressing issues on-the-ground that could result in targeted easing measures to bolster growth and lift sentiment. Investors however remain doubtful on whether the stimulus measures would suffice to arrest the decline in growth as gains made in July were quickly neutralised by the end of August. Bright spots were seen in China’s economy by September as recent purchasing managers index (“PMI”) data bouncing back to expansion territory climbing to 50.2 in September from 49.7 in the previous month, beating market expectations. The 50-point threshold separates growth from contraction.

Back in Malaysia, several policy announcements by the government caught the attention of investors. These positive sentiments lifted foreign investors’ confidence as they poured into local equities. These included the Ekonomi Madani Plan which outlined several key economic targets, Part 1 of the National Energy Transition Roadmap which intends to achieve 70% renewable energy capacity mix by 2050 and Part 2 of the National Energy Transition Roadmap as well as the New Industrial Masterplan. There was also greater political clarity following the conclusion of state elections. As widely expected, the Pakatan Harapan-Barisan Nasional coalition retained Selangor, Penang and Negeri Sembilan, while Perikatan Nasional held on to their strongholds in Kedah, Kelantan and Terengganu. The more recent by-elections for the Pulai parliamentary seat and Simpang Jeram state seat in Johor concluded with the Pakatan Harapan-Barisan Nasional (PH-BN) coalition defending both seats.

In line with a higher U.S. Treasury (“UST”), the MGS yields also bore the brunt selling off by +10-17bps higher month on month in September 2023, led by the long end. The MGS curve bear steepened moderately

in 3Q23 as investors demand a higher risk premium on long duration in a bearish environment while the front end held up better as Bank Negara Malaysia's ("BNM") language in the September Monetary Policy Committee ("MPC") meeting gave clearer signal of an extended OPR pause for the remaining of the year. The yields for 3-year, 5-year, and 10-year papers ended September 2023 at 3.58% (+12bps), 3.72% (+14bps) and 3.98% (+14bp), respectively with the 30-year yield +17bps closing the month at 4.44%. We may see further correction in yields as USTs remain volatile while the domestic bond market has done relatively well over the past 8 months.

The strong US growth, higher coupon supply and renewed inflation concerns following higher oil prices weighed heavily on USTs by the end of the financial year. The 2-year, 5-year and 10-year yields ended the September 2023 at 5.04% (+18bps), 4.61% (+35bps) and 4.57% (+46bps) respectively. The 30-year UST also went higher by 49bps to close at 4.70%. The inversion between the 2-year and 10-year US Treasury narrowed to -47bps (Aug: -75bps).

### **Investment Outlook**

The US economic data continue to send mixed signals, leading to an increased market conviction that the US may avoid a recession in 2023 and move towards a soft landing. Economic data has been stronger than expected and earnings have been resilient. The larger cap stocks in particular have outperformed driven by various factors. There is a risk that the Fed will hike rates by another 25bps in 2023; however. With developed markets peak cycle in the horizon, risk appetite is seen returning to the Emerging Markets ("EM") space given that EM has better shielded economics against inflation.

In Asia, improvements in China's economic data may indicate that the country's economic downturn is stabilising. It will be crucial to continuously monitor key economic indicators and substantial stimulus announcements from Beijing.

Local factors remain supportive of MGS given slower GDP growth, moderate inflation, stable interest rate and neutral supply profile although UST risk persist. Easing inflationary pressure and resilient demand from domestic investors could also provide support. The state election results affirmed the current political status quo, we could see renewed focus by the government on implementing policy reforms. Expectations are high for fiscal reform measures, including targeted fuel subsidies and stimulus packages for significant infrastructure projects. We could also see more granular details on policy frameworks previously announced such as the National Energy Transition Roadmap and the New Industrial Master Plan.

### **State of Affairs of the Fund**

There is neither any significant change to the state affairs of the Fund nor any circumstances that materially affect any interests of the unit holders during the period under review.

### **Soft Commissions received from Brokers**

Soft commissions received from brokers/dealers may be retained by the management company only if the –

- (i) goods and services provided are of demonstrable benefit to Unit holders of the Fund; and
- (ii) goods and services are in the form of research and advisory services that assists in the decision making process.

During the financial period under review, the Fund has received soft commissions from brokers/dealers who have also executed trades for other funds managed by Affin Hwang Asset Management. The soft commissions were utilised for goods and services in the form of research materials, data and quotation services, investment-related publications, market data feed, industry benchmarking agencies and investment-related publications to assist the Manager in the investment decision-making process. The soft commission received were for the benefit of the fund and there were no churning of trades.

### **Cross Trade**

Cross trade transactions have been carried out during the reported period and that the compliance and risk oversight committee of the Fund has reviewed that such transactions are in the best interest of the Fund and transacted on an arm's length and fair value basis.

### **Securities Financing Transactions**

The Fund has not undertaken any securities lending or repurchase transactions during the financial period under review.

### **Changes Made To the Fund's Prospectus**

A Replacement Prospectus dated 27 February 2023 ("Effective Date") was issued during the financial period under review to reflect the various changes made to the Fund. This includes:

1. a change in the name of the Fund; and
2. updates to the investment restrictions and limits to be in line with the Securities Commission Malaysia's ("SC") Guidelines on Unit Trust Funds.

Kindly refer next page for the full list of changes made to the Fund.

NO.	(A) PROSPECTUS	(B) REPLACEMENT PROSPECTUS
	<p><b>Introduction:</b></p> <p>In general, the amendments made to the Prospectus are to reflect the following:</p> <ol style="list-style-type: none"> <li>1. Requirements of Guidelines on Unit Trust Funds (Revised: 28 November 2022) (“<b>Revised GUTF</b>”) and Prospectus Guidelines For Collective Investment Schemes (Revised; 1 September 2022) (“<b>Revised PCIS</b>”);</li> <li>2. Change in the shareholding of AHAM which took effect on 29 July 2022, whereby AHAM ceased to be a subsidiary of Affin Hwang Investment Bank and the Affin Banking Group. 6.3	Nil.	<p>Inserted the following after “<b>Loan/ financing risk</b>”:</p> <p><b><u>Liquidity risk</u></b> <u>Liquidity risk refers to two scenarios. The first is where an investment cannot be sold due to unavailability of a buyer for that investment. The second scenario exists where the investment, by its nature, is thinly traded. This will have the effect of causing the investment to be sold below its fair value which would adversely affect the NAV of the Fund and subsequently the value of Unit Holders’ investments in the Fund.</u></p>

For example, when profit rates rise, prices of investment will fall. The fluctuations of the prices of investment will also have an impact on the NAV of the Fund. This risk can largely be eliminated by holding the investment until their maturity. We also manage profit rate risk by considering each investment’s sensitivity to profit rate changes. When profit rates are expected to increase, the Fund would then likely seek to switch to investment that are less sensitive to profit rate changes. For investments in Islamic deposits, the fluctuations in the interest rates will not affect the placement of Islamic deposits but will result in the opportunity loss by the Fund if the placement of Islamic deposits is made at lower interest rate.</u></p>

**AHAM AIIMAN BALANCED FUND**  
**(FORMERLY KNOWN AS AFFIN HWANG AIIMAN BALANCED FUND)**

**SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**  
**FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 30 SEPTEMBER 2023**

The following accounting policies have been used in dealing with items which are considered material in relation to the financial statements.

**A BASIS OF PREPARATION OF THE FINANCIAL STATEMENTS**

The financial statements have been prepared in accordance with the Malaysian Financial Reporting Standards (“MFRS”) and International Financial Reporting Standards (“IFRS”). The financial statements have been prepared under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities (including derivative financial instruments) at fair value through profit or loss.

The preparation of financial statements in conformity with MFRS and IFRS requires the use of certain critical accounting estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the reported financial period. It also requires the Manager to exercise their judgment in the process of applying the Fund’s accounting policies. Although these estimates and judgment are based on the Manager’s best knowledge of current events and actions, actual results may differ.

The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note K.

(a) Standards, amendments to published standards and interpretations that are effective:

- Amendments to MFRS 3 ‘Reference to Conceptual Framework’ (effective 1 January 2022) replace the reference to Framework for Preparation and Presentation of Financial Statements with 2018 Conceptual Framework.
- Annual Improvements to MFRSs 2018 – 2020 Cycle (effective for annual periods beginning on or after 1 January 2022).
- Amendments to MFRS 137 ‘onerous contracts—cost of fulfilling a contract’ (effective 1 January 2022) clarify that direct costs of fulfilling a contract include both the incremental cost of fulfilling the contract as well as an allocation of other costs directly related to fulfilling contracts.

The adoption of the above standards, amendments to standards or interpretations did not have a material effect on the financial statements of the Fund.

(b) Standards and amendments that have been issued but not yet effective:

- Amendments to MFRS 101 ‘Classification of liabilities as current or non-current’ (effective 1 January 2024) clarify that liabilities are classified as either current or non-current, depending on the rights that exist at the end of the reporting period. Classification is unaffected by the entity’s expectations or events after the reporting date (e.g. the receipt of a waiver or a breach of covenant). In addition, the amendments clarify that when a liability could be settled by the transfer of an entity’s own equity instruments (e.g. a conversion option in a convertible bond), conversion option meeting the definition of an equity instrument in MFRS 132 ‘Financial Instruments: Presentation’ does not impact the current or non-current classification of the convertible instrument.

The amendments also specify that covenants of loan arrangements which an entity must comply with only after the reporting date would not affect classification of a liability as current or non-current at the reporting date. However, those covenants that an entity is required to comply with on or before the reporting date would affect classification of a liability as current or non-current, even if the covenant is only assessed after the reporting date.

The adoption of the above standards, amendments to standards or interpretations is not expected to have a material effect on the financial statements of the Fund.

**B INCOME RECOGNITION**

Dividend income

Dividend income from Shariah-compliant investments is recognised in the statement of comprehensive income as part of gross dividend income on the ex-dividend rate, when the right to receive the dividend has been established.

Profit income

Profit income from short-term Shariah-based deposits with licensed financial institutions and unquoted sukuk are recognised based on effective profit rate method on an accruals basis.

Profit income is calculated by applying the effective profit rate to the gross carrying amount of a financial asset except for financial assets that subsequently become credit impaired. For credit-impaired financial assets the effective profit rate is applied to the net carrying amount of the financial asset (after deduction of the loss allowance).

Realised gains and losses on sales of investments

For Shariah-compliant quoted equities and exchange-traded funds ("ETF"), realised gain and losses on sale of investments is accounted for as the difference between the net disposal proceeds and the carrying amount of investments, determined on a weighted average cost basis.

For unquoted sukuk, realised gains and losses on sale of unquoted sukuk are accounted for as the difference between the net disposal proceeds and the carrying amount of Shariah-compliant investments, determined on cost adjusted for accretion of discount or amortisation of premium on investments for unquoted sukuk.

**C TRANSACTION COSTS**

Transaction costs are costs incurred to acquire financial assets or liabilities at fair value through profit or loss. They include the bid-ask spread, fees and commissions paid to agents, advisors, brokers and dealers. Transaction costs, when incurred, are immediately recognised in the statement of comprehensive income as expenses.

**D TAXATION**

Current tax expense is determined according to the Malaysian tax laws at the current rate based upon the taxable profit earned during the financial period.

**(FORMERLY KNOWN AS AFFIN HWANG AIIMAN BALANCED FUND)**

**SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**  
**FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 30 SEPTEMBER 2023 (CONTINUED)**

**D TAXATION (CONTINUED)**

Withholding taxes on investment income from investment are based on tax regime of the respective countries that the Fund invests in. Such withholding taxes are not “income tax” in nature and are recognised, measured based on the requirements of MFRS 137. They are presented within other expenses line in the statement of comprehensive income.

**E DISTRIBUTION**

A distribution to the Fund’s unitholders is accounted for as a deduction from realised reserve. A proposed distribution is recognised as a liability in the period in which it is approved by the Trustee of the Fund.

**F FUNCTIONAL AND PRESENTATION CURRENCY**

Items included in the financial statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates (the “functional currency”). The financial statements are presented in Ringgit Malaysia (“RM”), which is the Fund’s functional and presentation currency.

**G FINANCIAL ASSETS AND FINANCIAL LIABILITIES**

(i) Classification

The fund classifies its financial assets in the following measurement categories:

- those to be measured at fair value through profit or loss, and
- those to be measured at amortised cost

The Fund classifies its investments based on both the Fund’s business model for managing those financial assets and the contractual cash flow characteristics of the financial assets. The portfolio of financial assets is managed and performance is evaluated on a fair value basis. The Fund is primarily focused on fair value information and uses that information to assess the assets’ performance and to make decisions. The Fund has not taken the option to irrevocably designate any equity securities as fair value through other comprehensive income.

The contractual cash flows of the Fund’s debt securities are solely principal and interest\* (“SPPI”). However, these securities are neither held for the purpose of collecting contractual cash flows nor held both for collecting contractual cash flows and for sale. The collection of contractual cash flows is only incidental to achieving the Fund’s business model’s objective. Consequently, all investments not designated as hedging instruments are measured at fair value through profit or loss.

The Fund classifies cash and cash equivalents, amount due from Manager and dividend receivables as financial assets at amortised cost as these financial assets are held to collect contractual cash flows that represent SPPI.

The Fund classifies amount due to broker, amount due to Manager, amount due to trustee, fund accounting fee, auditors’ remuneration, tax agent’s fee and other payables and accruals as financial liabilities measured at amortised cost.

*\* For the purposes of this Fund, interest refers to profits earned from Shariah-compliant investments.*

(ii) Recognition and measurement

Regular purchases and sales of financial assets are recognised on the trade-date – the date on which the Fund commits to purchase or sell the asset. Shariah-compliant investments are initially recognised at fair value. Transaction costs are expensed in the statement of comprehensive income.

Financial liabilities, within the scope of MFRS 9, are recognised in the statement of financial position when, and only when, the Fund becomes a party to the contractual provisions of the financial instrument.

Financial assets are derecognised when the rights to receive cash flows from the investments have expired or have been transferred and the Fund has transferred substantially all risks and rewards of ownership.

Financial liabilities are derecognised when it is extinguished, i.e., when the obligation specified in the contract is discharged or cancelled or expired.

Gain or losses arising from changes in the fair value of the ‘financial assets at fair value through profit or loss’ category is presented in the statement of comprehensive income within ‘net gain/(loss) on financial assets at fair value through profit or loss’ in the financial period which they arise.

The fair value of financial assets traded in active markets (such as trading securities) are based on quoted market prices at the close of trading on the financial period end date. The Fund utilises the last traded market price for financial assets where the last traded price falls within the bid-ask spread. In circumstances where the last traded price is not within the bid-ask spread, the Manager will determine the point within the bid-ask spread that is most representative of the fair value.

If a valuation based on the market price does not represent the fair value of the securities, for example during abnormal market conditions or when no market price is available, including in the event of a suspension in the quotation of the securities for a period exceeding 14 days, or such shorter period as agreed by the Trustee, then the securities are valued as determined in good faith by the Manager, based on the methods or basis approved by the Trustee after appropriate technical consultation.

Unquoted sukuk securities including money market instruments denominated in Ringgit Malaysia are revalued on a daily basis based on fair value prices quoted by a bond pricing agency (“BPA”) registered with the Securities Commission (“SC”) as per the SC’s Guidelines on Unit Trust Funds. Where such quotation is not available or where the Manager is of the view that the price quoted by the BPA for a specific unquoted fixed income securities differs from the market price by more than 20 basis points, the Manager may use the market price, provided that the Manager:

- (i) records its basis for using non-BPA price;
- (ii) obtains necessary internal approvals to use the non-BPA price; and
- (iii) keeps an audit trail of all decisions and basis for adopting the market yield.

Investment in ETF is valued based on quoted market prices at the close of trading on the reporting date.

Financial assets at amortised cost and other financial liabilities are subsequently carried at amortised cost using the effective profit method.

(iii) Impairment

The Fund's financial assets measured at amortised cost are subject to expected credit losses. The Fund measures credit risk and expected credit losses using probability of default, exposure at default and loss given default. Management considers both historical analysis and forward-looking information in determining any expected credit loss. Management considers the probability of default to be close to zero as these instruments have a low risk of default and the counterparties have a strong capacity to meet their contractual obligations in the near term. As a result, no loss allowance has been recognised based on 12 month expected credit losses as any such impairment would be wholly insignificant to the Fund.

Significant increase in credit risk

A significant increase in credit risk is defined by management as any contractual payment which is more than 30 days past due.

Definition of default and credit-impaired financial assets

The Fund defines a financial instrument as default, which is fully aligned with the definition of credit-impaired, when it meets one or more of the following criteria:

Quantitative criteria:

Any contractual payment which is more than 90 days past due is considered credit-impaired.

Qualitative criteria:

The debtor meets unlikeliness to pay criteria, which indicates the debtor is in significant financial difficulty. The Fund considers the following instances:

- the debtor is in breach of financial covenants
- concessions have been made by the lender relating to the debtor's financial difficulty
- it is becoming probable that the debtor will enter bankruptcy or other financial reorganisation
- the debtor is insolvent

Financial instruments that are credit-impaired are assessed on individual basis.

Write-off

The Fund writes off financial assets, in whole or in part, when it has exhausted all practical recovery efforts and has concluded there is no reasonable expectation of recovery. The assessment of no reasonable expectation of recovery is based on unavailability of debtor's sources of income or assets to generate sufficient future cash flows to repay the amount.

The Fund may write off financial assets that are still subject to enforcement activity. Subsequent recoveries of amounts previously written off will result in bad debt recoveries. There are no write-offs/recoveries during the financial period.

**H CASH AND CASH EQUIVALENTS**

For the purpose of statement of cash flows, cash and cash equivalent comprise cash and bank balances and short-term Shariah-based deposits held in highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

**I AMOUNTS DUE FROM/(TO) BROKERS**

Amounts due from and to brokers represent receivables for securities sold and payables for securities purchased that have been contracted for but not yet settled or delivered on the statement of financial position date respectively. The due from brokers balance is held for collection. Refer to Note G for accounting policy on recognition and measurement.

Any contractual payment which is more than 90 days past due is considered credit-impaired.

Significant financial difficulties of the brokers, probability that the brokers will enter bankruptcy or financial reorganisation, and default in payments are all considered indicators that a loss allowance may be required.

**J UNITHOLDERS' CAPITAL**

The unitholders' contributions to the Fund meet the criteria to be classified as equity instruments under MFRS 132 "Financial Instruments: Presentation". Those criteria include:

- the units entitle the holder to a proportionate share of the Fund's net asset value ("NAV");
- the units are the most subordinated class and class features are identical;
- there are no contractual obligations to deliver cash or another financial asset other than the obligation on the Fund to repurchase; and
- the total expected cash flows from the units over its life are based substantially on the profit or loss of the Fund.

The outstanding units are carried at the redemption amount that is payable at each financial period if unitholder exercises the right to put the units back to the Fund.

Units are created and cancelled at the unitholder's option at prices based on the Fund's NAV per unit at the time of creation or cancellation. The Fund's NAV per unit is calculated by dividing the net assets attributable to unitholders with the total number of outstanding units.

**K CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS IN APPLYING ACCOUNTING POLICIES**

The Fund makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, rarely equal the related actual results. To enhance the information content of the estimates, certain key variables that are anticipated to have material impact to the Fund's results and financial position are tested for sensitivity to changes in the underlying parameters.

Estimates and judgments are continually evaluated by the Manager and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

However, the Manager is of the opinion that there are no accounting policies which require significant judgment to be exercised.

In undertaking any of the Fund's Shariah-compliant investment, the Manager will ensure that all assets of the Fund under management will be valued appropriately, that is at fair value and in compliance with the SC's Guidelines on Unit Trust Funds.

**L REALISED AND UNREALISED PORTIONS OF PROFIT OR LOSS AFTER TAX**

The Fund is exposed to a variety of risks which include market risk (including price risk and profit rate risk), credit risk, liquidity risk, capital risk and reclassification of Shariah status risk.

Financial risk management is carried out through internal control processes adopted by the Manager and adherence to the investment restrictions as stipulated by the SC's Guidelines on Unit Trust Funds.

Market risk

(a) Price risk

Price risk arises mainly from the uncertainty about future prices of investments. It represents the potential loss the Fund might suffer through holding market positions in the face of price movements. The Manager manages the risk of unfavourable changes in prices by continuous monitoring of the performance and risk profile of the investment portfolio.

The Fund's overall exposure to price risk was as follows:

	<u>2023</u> RM	<u>2022</u> RM

\* Includes profit receivable of RM79,073 (2022: RM94,291)

The following table summarises the sensitivity of the Fund's profit/(loss) after taxation and NAV to price risk movement. The analysis is based on the assumptions that the market price increased by 10% (2022: 2%) and decreased by 10% (2022: 2%) with all other variables held constant. This represents management's best estimate of a reasonable possible shift in the quoted securities having regard to the historical volatility of the prices.

	<u>                    </u>	<u>                    </u>

(b) Profit rate risk

In general, when profit rates rise, unquoted sukuk prices will tend to fall and vice versa. Therefore, the NAV of the Fund may also tend to fall when profit rates rise or are expected to rise. However, investors should be aware that should the Fund hold an unquoted sukuk till maturity, such price fluctuations would dissipate as it approaches maturity, and thus the growth of the NAV shall not be affected at maturity. In order to mitigate profit rate exposure of the Fund, the Manager will manage the duration of the portfolio via shorter or longer tenured assets depending on the view of the future profit rate trend of the Manager, which is based on its continuous fundamental research and analysis.

This risk is crucial in an unquoted sukuk fund since unquoted sukuk portfolio management depend on forecasting profit rate movements. Prices of unquoted sukuk move inversely to profit rate movements, therefore as profit rates rise, the prices of unquoted sukuk decrease and vice versa. Furthermore, unquoted sukuk with longer maturity and lower yield coupon rates are more susceptible to profit rate movements.

Investors should note that unquoted sukuk and money market instruments are subject to profit rate fluctuations. Such investments may be subject to unanticipated rise in profit rates which may impair the ability of the issuers to make payments of profit income and principal, especially if the issuers are highly leveraged. An increase in profit rates may therefore increase the potential of default by an issuer.

(b) Profit rate risk (continued)

The table below summarises the sensitivity of the Fund's profit/(loss) after taxation and NAV to movements in prices of unquoted sukuk held by the Fund as a result of movement in profit rates. The analysis is based on the assumptions that the profit rate increased and decreased by 2% (2022: 2%) with all other variables held constant.

<u>% Change in profit rate</u>	<u>Impact on profit/(loss) after tax/ NAV</u>	
	<u>2023</u> RM	<u>2022</u> RM
+ 2% (2022: + 2%)	(25,298)	(33,302)
- 2% (2022: - 2%)	25,469	33,550

The Fund's exposure to profit rate risk associated with Shariah-based deposit with a licensed financial institution is not material as the carrying value of the deposit is held on a short-term basis.

Credit risk

Credit risk refers to the ability of an issuer or counterparty to make timely payments of profit, principals and proceeds from realisation of investments. The Manager manages the credit risk by undertaking credit evaluation to minimise such risk.

Credit risk arising from cash and bank balances is managed by ensuring that they are held by parties with credit rating of AA or higher.

Credit risk arising from placements of Shariah-based deposits in licensed financial institutions is managed by ensuring that the Fund will only place deposits in reputable licensed financial institutions.

The settlement terms of amount due from brokers are governed by the relevant rules and regulations as prescribed by the respective stock exchange.

The settlement terms of the proceeds from the creation of units' receivable from the Manager are governed by the SC's Guidelines on Unit Trust Funds.

For unquoted sukuk, the Manager regularly reviews the rating assigned to the issuer so that necessary steps can be taken if the rating falls below those described by the Deeds and SC's Guidelines on Unit Trust Funds.

Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting its financial obligations. The Manager manages this risk by maintaining sufficient level of Shariah-based liquid assets to meet anticipated payments and cancellation of units by unitholders. Shariah-based liquid assets comprise cash, Shariah-based deposits with licensed financial institutions and other instruments, which are capable of being converted into cash within 7 days.

The table below analyses the Fund's financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position date to the contractual maturity date.

The amounts in the table below are the contractual undiscounted cash flows:

Capital risk

The capital of the Fund is represented by equity consisting of unitholders' capital and retained earnings. The amount of equity can change significantly on a daily basis as the Fund is subject to daily subscriptions and redemptions at the discretion of unitholders.

**2 FINANCIAL INSTRUMENTS, RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)**

Capital risk (continued)

The Fund's objective when managing capital is to safeguard the Fund's ability to continue as a going concern in order to provide returns for unitholders and benefits for other stakeholders and to maintain a strong capital base to support the development of the investment activities of the Fund.

Reclassification of Shariah status risk

The risk that the currently held Shariah-compliant securities in the portfolio of Shariah-based funds may be reclassified to be Shariah non-compliant upon review of the securities by the Shariah Advisory Council of the Securities Commission performed twice yearly. If this occurs, the value of the fund may be adversely affected where the Manager will take the necessary steps to dispose of such securities in accordance with the Shariah Advisory Council's advice. As at 30 September 2023 and 30 September 2022, all investments held are Shariah Compliant counters as approved by the Shariah Advisory Council.

**3 FAIR VALUE ESTIMATION**

Financial instruments comprise financial assets and financial liabilities. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value of financial assets traded in active markets (such as trading securities) is based on quoted market prices at the close of trading on the financial period end date. The Fund utilises the current bid price for financial assets which falls within the bid-ask spread.

An active market is a market in which transactions for the asset take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

The fair value of financial assets and financial liabilities that are not traded in an active market is determined by using valuation techniques.

(i) Fair value hierarchy

The table below analyses financial instruments carried at fair value. The different levels have been defined as follows:

- Quoted prices (unadjusted) in active market for identical assets or liabilities (Level 1)
- Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2)
- Inputs for the asset and liability that are not based on observable market data (that is, unobservable inputs) (Level 3)

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgment, considering factors specific to the asset or liability.

**3 FAIR VALUE ESTIMATION (CONTINUED)**

(i) Fair value hierarchy (continued)

The determination of what constitutes 'observable' requires significant judgment by the Fund. The Fund considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary and provided by independent sources that are actively involved in the relevant market.

The following table analyses within the fair value hierarchy the Fund's financial assets (by class) measured at fair value:

	<u>Level 1</u> RM	<u>Level 2</u> RM	<u>Level 3</u> RM	<u>Total</u> RM
<u>2023</u>				
Financial assets at fair value through profit or loss:				
- Shariah-compliant quoted equities	8,770,918	-	-	8,770,918
- exchanged-traded fund	251,239	-	-	251,239
- unquoted sukuk	-	6,985,386	-	6,985,386
	<u>9,022,157</u>	<u>6,985,386</u>	<u>-</u>	<u>16,007,543</u>
<u>2022</u>				
Financial assets at fair value through profit or loss:				
- Shariah-compliant quoted equities	7,710,370	-	-	7,710,370
- exchanged-traded fund	423,360	-	-	423,360
- unquoted sukuk	-	7,802,758	-	7,802,758
	<u>8,133,730</u>	<u>7,802,758</u>	<u>-</u>	<u>15,936,488</u>

Investments whose values are based on quoted market prices in active markets, and are therefore classified within Level 1, include active listed equities and exchanged-traded fund. The Fund does not adjust the quoted prices for these instruments.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2. This include unquoted sukuk. As Level 2 instruments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

- (ii) The carrying amount of cash and cash equivalents, amount due from Manager, dividend receivables, and all current liabilities are a reasonable approximation of the fair values due to their short-term nature.
