The Fund is a retail feeder fund that invests in the Target Fund, which in turn invests in physical Gold Bars purchased from LBMA accredited refineries. The performance of this Fund would to a great extent be linked to the price movements of the Target Fund which in turn is reliant on the performance of Gold price.

As such, the value of your investments will be reliant on the performance of the Target Fund. This means that if the Target Fund performs well, the Fund may reflect similar performance and likewise if the performance of the Target Fund falls, the value of your investment will also be affected. The Fund's performance is dependent on the Target Fund Manager's expertise in managing the Fund.

The Fund is not expected to make distribution. However, incidental distribution may be declared whenever is appropriate.

Please note that the capital and returns of the Fund are not guaranteed.

* At our discretion, we may reduce the transaction value and Units, including for transactions made via digital channels, subject to the terms and conditions disclosed in the respective channels.

KEY RISKS

6. What are the key risks associated with this product?

General Risks

- **Fund management risk** – This risk refers to our day-to-day management of the Fund which will impact the performance of the Fund. For example, our investment decisions as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error, fraud, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.
- **Capital and Returns Not Guaranteed** – You should be aware that by investing in the Fund, there is no guarantee of any returns or capital appreciation. Unlike fixed deposits placed directly by the investors into any financial institutions which carry a specific rate of return, this Fund does not provide a fixed rate of return. There is no guarantee that you will enjoy any capital appreciation or will not experience any loss of capital invested in the Fund.
- **Inflation risk** – This is the risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
- **Financing risk** – This risk occurs when you take a financing to finance your investment. The inherent risk of investing with financed money includes you being unable to service the financing payments. In the event Units are used as collateral, you may be required to top-up your existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower NAV per Unit as compared to the NAV per Unit at the point of purchase towards settling the loan.
- **Operational risk** – This risk refers to the possibility of a breakdown in our internal controls and policies. The breakdown may be a result of human error, system failure or fraud where our employees collude with one another. This risk may cause monetary loss and/or inconvenience to you. We will regularly review our internal policies and system capability to mitigate this risk. Additionally, we maintain a strict segregation of duties to mitigate instances of fraudulent practices amongst our employees.
- **Suspension of repurchase request risk** – Having considered the best interests of Unit Holders, the repurchase requests by the Unit Holders may be subject to suspension due to exceptional circumstances, where the market value or fair value of a material portion of the Fund's assets cannot be determined. Such exceptional circumstances may occur when, amongst others, the trading of the Target Fund units on Bursa Securities is suspended or delisted. In such case, Unit Holders will not be able to redeem their Units and will be compelled to remain invested in the Fund for a longer period of time. Hence, their investments will continue to be subject to the risks inherent to the Fund.

Specific Risks

- **Concentration risk** – As a feeder fund, this Fund invests in a single collective investment scheme. Any adverse effect on the Target Fund will inevitably affect the Fund as well. The performance of the Fund is also dependent on the performance of the Target Fund. This risk may be mitigated as we are allowed to take temporary defensive positions in response to adverse market conditions.
- **Liquidity risk** – Liquidity risk refers to the risk that units of the Target Fund cannot be sold due to unavailability of buyers for such units or restriction on realisation of units of the Target Fund. This will have the effect of causing the investment to be sold below its fair value which would adversely affect the NAV of the Fund and subsequently the value of Unit Holders' investments in the Fund. In order to mitigate such risk, we will maintain sufficient liquidity level for the purposes of meeting redemption requests.
- **Counterparty risk** – Counterparty risk concerns the Fund's investment in Islamic derivatives ("Investments"). Counterparty risk is prevalent as the potential returns derived from the Investments are dependent on the ongoing ability and willingness of the issuer i.e a Financial Institution to fulfill their respective financial commitments in a timely manner. Bankruptcy, fraud or regulatory non-compliance arising out of and/or in connection with the issuer may impair the operations and/or the performance of the Fund. However, we will conduct stringent credit selection process of the issuer of the Investments prior to commencement of Investments and monitoring mechanisms established by us may potentially mitigate this risk. If, we are of the opinion there is material adverse change to an issuer, we may consider unwinding the issuer's Investments to mitigate potential losses that may arise.
- **Legal and Regulatory risk** – The Fund must comply with regulatory constraints or changes in the laws affecting it or its investment restrictions which might require a change in the investment policy and objective followed by the Fund. Furthermore, such changes in the laws may have an impact on the market sentiment which may in turn affect the performance of the Fund. It is impossible to predict whether such impact caused by any change in the law will be positive or negative for the Fund. In the worst case scenario, a Unit Holder may lose all his investments in the Fund.
- **Related Party Transaction risk** – The Fund invests in AHAM's collective investment scheme and may also have dealings with parties related to AHAM. Nevertheless, it is our policy that all transactions with related parties are to be

executed on terms which are best available to the Fund and which are not less favourable to the Fund than an arms-length transaction between independent parties.

- **Reclassification of Shariah-status risk** – This risk refers to the risk that the currently held Shariah-compliant instruments in the Fund may be reclassified to be Shariah non-compliant in the periodic review of the securities by the SACSC, the Shariah Adviser or the Shariah boards of the relevant Islamic indices (if applicable). If this occurs, we will take the necessary steps to dispose of such instruments. There may be opportunity loss to the Fund due to the Fund not being allowed to retain the excess capital gains derived from the disposal of the Shariah non-compliant instruments. We will be required to dispose of these instruments immediately if the prices are above the purchase price. Should the prices be below the purchase price, we may choose to hold on to these holdings until the prices meet the purchase price. Nevertheless, should we decide to dispose of these instruments below the purchase price, the Fund will be faced with the risk of realising its losses, thus negatively impacting the NAV of the Fund. Please refer to “Shariah Investment Guidelines” of this Prospectus on the Fund’s Shariah methodology on the treatment of gains and losses as a result of the reclassification of Shariah non-compliant instruments.
- **Shariah non-compliance risk** – As the Fund can only invest in Shariah-compliant investments, there is always a risk that losses may be suffered by the Fund when the Manager is forced to dispose investments to rectify any Shariah non-compliance. This risk is mitigated through the appointment of the Shariah Adviser, who will be responsible to ensure that the Fund is managed and administered in accordance with Shariah requirements.

Note: Please refer to the Prospectus for further details on each risk.

It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are recommended to read the whole Prospectus to assess the risks associated with the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.
